Spedition Schmitt replaces system landscape with inconsoWMS S

Bad Nauheim, July 2, 2009

Spedition Schmitt GmbH (Vellberg) operates a finished goods warehouse under customer contract in Schwäbisch Hall/Sulzdorf. The country branches European-wide are predominantly supplied with goods from here. For further acceleration and

optimization of the processes and for the increase in logistics quality, Spedition Schmitt will replace the existing system landscape with a new uniform warehouse management and control system. The well-established logistics service provider decided for inconsoWMS Standard. At the same time, two other warehouses will be added to the processes controlled in the new system. The connection as a sub-system under the SAP system of the customer occurs with interfaces. These interfaces enable, on one hand, to possibility to maintain the use of proven methods for exchanging data between ERP and LVS and, on the other hand, the possibility to be able to de-couple the processes on that level.

The crucial factor for the order commissioning was the far reaching experience of inconso AG, the leading provider of logistics solutions in Germany, both with its own „Best-of-Breed“ solution inconsoWMS and with SAP EWM and LES based logistics systems. Additionally, inconsoWMS Standard proved to be particularly suitable based on its functional coverage and its modular component approach to fulfil the requirements of Spedition Schmitt and to achieve the desired advantages for stock reliability, uniformity of data, worker instructions, time and cost savings. Beyond that, the servicer provider secured additional competitive advantages through the increase in flexibility.

Spedition Schmitt GmbH was founded in 1935 and operates today in Germany and a large part of the EU with its own truck transports. From 1983, they also set up the warehouse logistics and offer a complete portfolio of a modern logistics service provider. The warehouse logistics has ca. 100.000 m² of warehouse space available for the different requirements. Spedition Schmitt places a lot of value on the long-term business relationships on the basis of the highest logistics quality.
