SKS bicycle accessories roll over inconsoWMS S to the retail stores

Bad Nauheim, August 12, 2009

SKS Metaplast GmbH in Sundern (Scheffer Klute, Sundern) produces bicycle accessories such as air pumps, wheel guard elements and various special tools. The SKS Group operates a finishing warehouse at the site in Meschede-Freienohl that

delivers to the customers. Here and in an additional off-premises warehouse, they also supply additional logistics services for the affiliate companies in the SKS Group and another external customer. In order to be able to complete the new and extended requirements on the logistics processes with an increased quality, the warehouse layout, the processes and their technical information support had to be realigned.

As the heart of the warehouse management and control for the SKS Metaplast material spectrum, inconsoWMS S is now being used. inconsoWMS S has especially enabled SKS to substantially increase the picking throughput with the Multi-Order-Picking functionality. In addition, inconso AG set up the entire radio data transmission system including a site survey, WLAN and the required hardware. From the order commissioning of inconso, the leading provider of consulting and software solutions for logistics in Germany, through to the operative start, the project was within budget and completed on-time in only four months.

The reason for the realignment of the logistics was the setup of a B2B shop for the retail stores that allows the customers of SKS Metaplast to order goods online. In order to quickly and reliably process this order volume, separate warehouse areas were established in the Meschede-Freienohl warehouse and a direct replenishment
