First inconso SAP Workshop in Switzerland met with large interest

Bad Nauheim, November 19, 2009

On November 11, 2009, inconso AG held a workshop for the first time in Switzerland. Customers and interested potential clients were invited to Basel where the topics „SAP Solutions for Supply Chain Excellence“ were met with great interest. The manner of a practical introduction to a complex question using live demos was received very positively. In the feedback questionnaire, all participants expressed that they would visit such a workshop again and were impressed with the high quality of the presentations.

The participants were particularly interested when inconso board member Thomas Gries referred to the „Quick Check for SAP Logistics“ in his presentation about „Intralogistics with SAP EWM and SAP LES.“ To support the fundamental decisions prior to starting complex logistics projects, inconso has developed a flexible instrument which helps to align the requirements and conditions from the logistics with the broad offering of SAP standard modules and additional SAP Add-Ons. Based technically and methodically structured process for intra or transport logistics, a company receives a fundamental overview of which areas of the IT strategy are already covered, what must eventually be supplemented and which solutions are the best fit. A first overview of the possible costs and the timeframes for implementation and startup round out the „Quick Check for SAP Logistics“.

In addition, the other presentations of the leading supplier of consulting and software solutions for logistics in Germany offered a diversified and practical experience oriented overview about intra- and transport logistics solutions with SAP. Among others, Dr. Gerd Wintermeyer discussed the changing economical conditions and their consequences for the setup and controlling of delivery chains and networks. Michael Kinzig described the possibilities and limitations of Transport

Managements with SAP ERP and SAP TM, while Olaf Moschkau presented the SAP Add-Ons, which inconso uses in customer projects as Best Practice Solutions to close identified process gaps. In these solutions, there are SAP Add-Ons for route optimization, load space optimization, Yard Management, freight costs management, transport execution, resource management, empties and returns management, dangerous goods processing, customs interfacing, Tracking & Tracing and telematics connections.

Anselm Roth, from SAP Deutschland, contributed the presentation of the SAP solution portfolio and the further planning of the market leader from Walldorf and thus to the success of the workshop quite considerably.

Thomas Gries, responsible in the inconso board of directors for the SAP Logistic, was pleased with the course of the event: „The day confirmed our expectations that there is a large potential for logistics solutions with SAP in Switzerland. Competent partners in this area are being searched for and we could help our customers and interested clients thanks to our extensive experience. We will be working to deepen the contact to the representatives of SAP (Switzerland) AG“.
