Smooth customs processing

inconso AG implements an IT solution for the customs processing with TIA innovations GmbH at Magnet-Schultz

Bad Nauheim, December 2, 2009

At the head office of the MSM Group, the Magnet-Schultz GmbH & Co. KG in Memmingen, inconso AG has implemented the release AES 2.0 of the electronic export processes for customs management with the direct connection to SAP ERP. The solution is based on a SAP Add-on and the TIA AES 2.0 Customs software. This complete solution is

marketed by the logistics software specialist inconso together with TIA innovations GmbH.

The MSM Group develops and produces high quality actuators and sensors for the aviation industry, automotive industry, automation technology, apparatus manufacturing, medicine technology, hydraulics and pneumatics. A considerable part of the German production is exported – the smooth processing of all customs formalities is therefore an indispensable basis of the business. Since July, the automatic export report is obligatory and the only way to report customs. The standard solution implemented by inconso allows the user to process the entire communication with the customs offices completely within SAP – from the export registration to the accompanying export documents through to the confirmation of the export.
